

c.1495_1497del — WFS1 Molecular Atlas Card

Variant type: In-frame indel

Change: 1 residue(s) deleted in frame at position 499

Domain context: Transmembrane helix 7

SCHEMA CATEGORY: I1 — SINGLE-RESIDUE DELETION IN A TRANSMEMBRANE HELIX — LIKELY CATASTROPHIC KINK

A single residue removed inside Transmembrane helix 7 shifts the helical register, which typically kinks or unwinds the helix and disrupts membrane insertion — structurally similar to a severe TM missense. Gene therapy track. Predicted structure pending (ColabFold).

STRUCTURAL PREDICTION

- **Reading frame:** preserved (in-frame) — no premature stop, NMD does not apply.
- **Affected domain:** Transmembrane helix 7
- **Predicted modified structure:** _pending — AlphaFold/ColabFold prediction of the modified sequence and backbone-RMSD vs wild-type backfill here (Wave 2)._
[backfill here \(Wave 2\).](#)

CLINICAL EVIDENCE

- **Classification:** Uncertain significance
 - **Review status:** criteria provided, multiple submitters, no conflicts
 - **cDNA change:** c.1495_1497del
 - **ClinVar accession:** VCV001519699
 - **Last evaluated:** 2026/01/11 00:00
 - **Submissions:** 1
