

# T125= — WFS1 Molecular Atlas Card

**Variant type:** Synonymous (silent)

**Codon:** position 125 (Threonine, T) — amino acid unchanged

**Domain context:** N-terminal cytoplasmic (intrinsically disordered)

---

## SCHEMA CATEGORY: SILENT — SILENT — NO AMINO-ACID CHANGE

---

No amino-acid change (T125 is unchanged): the codon is altered but the protein sequence is identical to wild-type. No structural, stability or AlphaMissense effect applies. Synonymous variants are typically benign unless they affect splicing or regulatory elements; this one is not adjacent to an exon boundary.

---

## CLINICAL EVIDENCE

---

- **Classification:** Conflicting classifications of pathogenicity
- **Review status:** criteria provided, conflicting classifications
- **Associated conditions:** WFS1-Related Spectrum Disorders; Wolfram syndrome 1; Autosomal dominant nonsyndromic hearing loss 6
- **cDNA change:** c.375C>T
- **ClinVar accession:** VCV000228239
- **Last evaluated:** 2025/06/17 00:00
- **Submissions:** 1
